

Rich Communication Software Client Kit

EcRIO delivered the first Rich Messaging solution to the mobile communications industry in 2000. Since then EcRIO has expanded and refined a comprehensive portfolio of mobile communication client products that meet the demanding requirements of operators, device manufacturers, service infrastructure providers and platform providers.

The Rich Communication Client Software Kit includes the essential client software needed to quickly develop compelling communication client applications, confirm interoperability with service systems, and assess the user experience. EcRIO works with its industry partners to ensure interoperability with the common service infrastructure and network systems, device platforms, and application environments.

The Rich Communication Client Software Kit includes:

- IP Multimedia Subsystem (IMS) Client Framework
- Contact and Group Management
- File Transfer
- Image Share
- Instant Messaging
- Presence
- Video Share
- Optional Modules Include: Push-to-Talk, Voice-over-IP, and SMS over IP

EcRIO and the Rich Communication kit support the Rich Communication Suite (RCS) initiative organized through the GSMA. For more information on the RCS initiative see the website at www.gsmworld.com/rcs.

The Rich Communication Client Software Kit users include:

- Client Application Developers
- Operators and Service Providers
- Device Suppliers
- Infrastructure Providers
- Device Platform Providers
- Application Platform Providers

For more information visit our website at: www.ecrio.com or email us at: info@ecrio.com.

Rich Communication Software Client Kit

- Standards and Best Practices Compliant
- Proven Application Engines and Enablers
- Device Platform Independent
- Interoperable with Leading Service Infrastructure Systems

Rich communication requires a complex set of end-to-end applications and services to be integrated and orchestrated to provide compelling experiences for users. EcRIO has proven products and experience to reduce complexity, time, and ensure interoperability.

"EcRIO brought SK Telecom a robust and proven, feature-rich platform on which to base our latest consumer offerings. With that foundation and EcRIO's experience deploying millions of 3G handsets in Asia, SK Telecom felt very comfortable choosing EcRIO as our strategic partner."

Dr. Jae W. Byun, SK Telecom
Senior Vice President
